ASSMR TECHNICAL DIVISIONS

The Society recognizes the value of small professional groups organized to concentrate on specific surface mining and land reclamation concerns. Our technical division program serves this purpose by providing the umbrella under which these groups can function. Each technical division is an independent group having the freedom to develop its own program while the Society provides a variety of support services.

For information about or participation in one of the ASSMR Technical Divisions contact the Division Chairperson listed below. Each of the technical divisions is hosting a business and a technical session during the 9th national meeting. Each conference participant is invited to attend these meetings. The times of these meetings and sessions are listed in the final program.
