Disclaimer

The papers contained in this proceedings were peer-reviewed and comments provided to the authors. However, it was the final responsibility of the authors to address these comments.

The content, recommendations and conclusions in this report are therefore those of the authors and not of the Alberta Government or its representatives.

This report is intended to provide government and industry staff with up-to-date technical information to assist in the preparation and review of Development and Reclamation Approvals, and development of guidelines and operating procedures. This report is also available to the public so that interested individuals similarly have access to the most current information on land reclamation topics.
